## Education

**Shivaji University, Kolhapur**

Bachelor of Science in Computer Science (B.Sc.) **Percentage: 80.20%**

Apr 2023

Kolhapur, Maharashtra

## Experience

**Techbulls SoftTech Pvt. Ltd.**

Software Developer

Feb 2025 – Present

Pune, Maharashtra

- Implemented microservices architecture using Spring Boot for scalable and modular applications.
- Worked with Oracle databases to design, optimize, and maintain data-driven applications.
- Developed AI-driven solutions in Python, applying prompt engineering with LangChain and LangGraph to automate SDLC project generation and deployment.

**Codeest Software Technologies Pvt. Ltd.**

Software Developer Trainee

Jun 2024 – Dec 2025

Pune, Maharashtra

- Enhanced website functionality using Spring Boot and AngularJS.
- Implemented database integration with AWS RDS (MySQL) for scalable data storage solutions.
- Collaborated with senior developers to design, develop, and maintain web applications using Java, Spring Boot, and Hibernate.
- Wrote clean, maintainable, and efficient Java code for backend systems.

## Projects

**E-commerce Shopping Cart Web Application** | Spring Boot, AngularJS, MySQL, AWS

- Led the development of a microservices-based e-commerce platform using Spring Boot, ensuring modularity and scalability.
- Designed and deployed a scalable RESTful API leveraging Spring Boot Framework for seamless client-server communication.
- Implemented database integration with AWS RDS (MySQL) for scalable data storage solutions.
- Collaborated with senior developers to design, develop, and maintain web applications using Java, Spring Boot, and Hibernate.

**Agastya** | Python, PostgreSQL, AngularJS, LangChain, LangGraph, AWS

- Automated SDLC documentation with Python + LangChain, reducing manual project setup time from days to hours.
- Built backend services in Python with PostgreSQL and AWS database integration, ensuring secure and scalable data storage.
- Implemented a user-friendly interface in AngularJS for project configuration and monitoring, improving accessibility for non-technical stakeholders.

## Technical Skills

**Languages:** Java

**Frameworks / Technologies:** Spring Boot, Hibernate, MyBatis, Spring Security, Docker, Git, GitHub, GitLab, AWS

**Databases:** MySQL, PostgreSQL

**Caching:** Redis

**Tools:** Postman, IntelliJ IDEA, VS Code, DBeaver

**Concepts:** Microservices Architecture, Object-Oriented Programming (OOP), Monolithic Architecture, Prompt Engineering
