Education

Shivaji University, Kolhapur

Apr 2023

Bachelor of Science in Computer Science (B.Sc.) | Percentage: 80.20%

Kolhapur, Maharashtra

- **Relevant Coursework:** Object-Oriented Programming in Java, Database Management Systems, Web Application Development

Experience

Techbulls SoftTech Pvt. Ltd.

Feb 2025 – Present

Software Developer

Pune, Maharashtra

- Developing and maintaining backend services for FinTech applications using Java and Spring Boot.
- Applied microservices architecture to support scalable and high-availability financial systems.
- Applied microservices architecture using Spring Boot to build scalable and modular backend applications.
- Designed, optimized, and maintained Oracle database schemas and queries for data-driven applications.

Codeest Software Technologies Pvt. Ltd.

Jun 2024 – Dec 2025

Software Developer Trainee

Pune, Maharashtra

- Enhanced website functionality by developing and maintaining backend services using Spring Boot and frontend components using Angular.
- Applied database integration using AWS RDS (MySQL) to ensure scalable and reliable data storage.
- Collaborated with senior developers to design, develop, and maintain full stack web applications using Java, Spring Boot, and Hibernate.
- Wrote clean, maintainable, and efficient Java code following best coding practices and standards.

Projects

Access Control System (ACS) – FinTech Backend | Java, Spring Boot, Microservices, Oracle

- Developed backend services for a FinTech Access Control System (ACS) to manage user authentication, authorization, and secure access to applications.
- Applied role-based access control (RBAC) and permission management to protect sensitive financial operations.
- Built and maintained RESTful APIs using Spring Boot and microservices architecture.
- Integrated Oracle database for storing user roles, permissions, and access policies with transactional consistency.

Smart School Management System | Java, Spring Boot, Angular, MySQL

- Designed and developed a full stack Smart School Management System to manage students, teachers, classes, and attendance.
- Built RESTful backend APIs using Spring Boot and executed frontend using Angular.
- Integrated MySQL database for efficient data storage and retrieval using Hibernate and JPA.
- Applied authentication, validation, and exception handling for reliable system behavior.

Technical Skills

Languages: Java, SQL

Backend Technologies: Spring Boot, Spring Data JPA, Hibernate, REST APIs, Microservices

Frontend Technologies: Angular, TypeScript, HTML5, CSS3, Bootstrap

Databases: Oracle, MySQL

Security & Concepts: Spring Security

Tools & Platforms: Git, GitLab, Maven, Postman
