Education

Shivaji University, Kolhapur

Apr 2023

Bachelor of Science in Computer Science (B.Sc.) | Percentage: 80.20%

Kolhapur, Maharashtra

- **Relevant Coursework:** Object-Oriented Programming in Java, Database Management Systems, Microservices Architecture, Web Application Development

Experience

Techbulls SoftTech Pvt. Ltd.

Feb 2025 – Present

Software Developer

Pune, Maharashtra

- Java Backend Developer with 2+ years of experience in developing and maintaining FinTech backend services using Java, Spring Boot, REST APIs, Microservices, and Oracle database.
- Worked on migration of Spring Boot applications from version 2.7.18 to the latest Spring Boot versions, including dependency upgrades, compatibility fixes, and application modernization and also solving Coverity Scan issues.
- Applied microservices architecture to support scalable and high-availability financial systems.
- Designed, optimized, and maintained Oracle database schemas and queries for data-driven applications.
- Resolved application security vulnerabilities, optimized code quality, and remediated VAPT findings, improving overall system security and maintainability.
- Contributed to the migration of a microservices-based Spring Boot application to a monolithic architecture.

Codeest Software Technologies Pvt. Ltd.

Jun 2024 – Dec 2024

Software Developer Trainee

Pune, Maharashtra

- Enhanced website functionality by developing and maintaining backend services using Spring Boot and frontend components using Angular.
- Applied database integration using AWS RDS (MySQL) to ensure scalable and reliable data storage.
- Collaborated with senior developers to design, develop, and maintain full stack web applications using Java, Spring Boot, and Hibernate.
- Wrote clean, maintainable, and efficient Java code following best coding practices and standards.

Projects

Access Control System (ACS) – FinTech Backend | Java, Spring Boot, Microservices, Oracle

- Developed backend services for a FinTech Access Control System (ACS) to manage user authentication, authorization, and secure access to applications.
- Applied role-based access control (RBAC) and permission management to protect sensitive financial operations.
- Built and maintained RESTful APIs using Spring Boot and microservices architecture.
- Integrated Oracle database for storing user roles, permissions, and access policies with transactional consistency.

UniversitySchoolOS – University & School Education System | Java, Spring Boot, PostgreSQL, JPA, Hibernate, Angular, Kafka, Docker,

- Designed and developed a feature-based and role-based University and School Education Management System for managing universities, schools, teachers, and academic operations.
- Implemented role-based access control to provide users with permissions and features based on their assigned roles and organizational hierarchy.
- Built RESTful backend APIs using Java and Spring Boot with layered architecture, validation, exception handling, and Spring Data JPA.
- Implemented PostgreSQL database persistence using Hibernate and JPA with entity relationships and optimized data access.
- Integrated Apache Kafka for asynchronous, event-driven communication and implemented Angular-based frontend modules consuming Spring Boot REST APIs.
- Containerized the application using Docker and configured Jenkins CI/CD pipelines for automated build and deployment.

Technical Skills

Languages: Java

Backend Technologies: Spring Boot, Spring Data JPA, Hibernate, REST APIs, Apache Kafka

Databases: PostgreSQL, Oracle

Security & Concepts: Spring Security, RBAC Authorization

DevOps & Tools: Docker, Jenkins, Git, GitLab, Maven, Postman
